ABOUT

4+ years of experience building scalable web applications using React, TypeScript, and modern backend technologies. Proven track record of migrating legacy systems, optimizing performance by 40%, and delivering customer-facing platforms. Strong problem-solving abilities, excellent communication skills, and experience leading cross-functional collaboration with stakeholders, QA teams, and external agencies. Business administration background provides unique perspective on user-centered development and product strategy.

EXPERIENCE

Full Stack Developer

SII Group for Scotiabank | August 2022 - January 2025

- Executed migration of 50% of legacy Mortgage Platform from VBA6 to ReactJS, achieving 90% test coverage using SonarQube and Jest testing frameworks, learned TypeScript from scratch in the process.
- Implemented backend integration by developing 100+ microservices/BFFs using Java Spring Boot, integrating Sybase and SQL Server within a 2-week period.
- Managed build and deployment processes in CI/CD development environments.
- Optimized mortgage tracking processes by 40% through stakeholder-driven platform enhancements.

Front End Developer

AFP UNO | May 2022 - July 2022

- Developed responsive user-facing web platforms (public/private) using ReactJS, ensuring cross-browser compatibility and mobile-first design based on Figma mockups.
- Implemented Google Tag Manager integration from scratch within 2-week sprint, enabling data-driven marketing campaigns and analytics tracking in collaboration with external digital agencies.
- Actively participated in Agile Scrum ceremonies, collaborated with QA engineers to resolve frontend bugs, and maintained high code quality standards through peer code reviews and continuous integration.

Full Stack Developer

MoveApps | May 2021 - April 2022

- Developed multi-client training platform using React, Node.js, and SailsJS with team of two more devs, implementing user authentication, role-based access control, administrative dashboards, and reusable UI components.
- Built RESTful APIs using SailsJS ORM with PostgreSQL database, implementing bulk email functionality and data validation following established architectural patterns.
- Contributed to critical patient transport platform development, implementing frontend features and optimizing transfer workflows through stakeholder collaboration.
